Calculator app not working android. Why is my android phone not working. Android calculator not working after update. Samsung android calculator not working. Why is my calculator not working on my android phone. Calculator not working in android phone. Android 11 calculator not working. What to do if your android screen won't work.

After last update my Andoid Calculator on my HTC M9 is not working correctly, something is not right. I do 1448 / 3 and get 6 I know that is not right. It also cant handle repeating decimals very well either. 06-02-2016 11:21 AM Like 0 Here is a photo 06-02-2016 11:23 AM Like 0 Welcome. Try first a Cache Partition wipe. If no go, try uninstall and reinstall of the app. 06-02-2016 12:02 PM Like 0 Yeah I tried clearing cache and data but issue persists. Also, this is the native Calculator App built into Android I cannot uninstall and reinstall. 06-02-2016 01:38 PM Like 0 Hello Josh, welcome to the forums. I've read a couple of reports about this same issue and so far I haven't found a fix. It's a weird problem. Rotate the screen to landscape and check if the result changes. Told you, weird As Belodion said you could try a cache partition wipe via recovery menu. It's completely different than clearing cache and data for the app. If no go you could try this. Go to settings - apps - calculator - force stop - clear data - disable and restart the phone. After this enable it back and see if it makes a difference. 06-02-2016 03:10 PM Like 0 I realized that after i replied. I tried the landscape and it outputs 666, creepy, also the incorrect answer 06-02-2016 03:37 PM Like 0 Android Calculator app may not be working for you due to some issues that your device may have or your internet connection problem. If you think that Android Calculator app has an issue, please post your issue using the comment box below and someone from our community may help you. Also in the mean time you can try the fixes mentioned below. It is one of the most common problem in android operating system. Usually when you open an app, you will see a black screen for few seconds and then app will crash with or without an error message. There are few ways to fix this problem. Most of the times, it might be a temporary loading issue. You just need to press the recent applications menu (usually the first left button) in your phone. Then you close the app that has this issue. Now open the app again. It may work normally. Try Hard reboot in your Android mobile. Press and hold down the "Home" and "Power" buttons at the same time for upto 10 seconds. Then, release the buttons and hold down "Power" button until the screen turns on.Now you can try opening the app, it may work fine. If none of the above working, you can wait till your phone battery drains and it turns off automatically. After that put it to charge, and press the power button. It may work after this. Finally, if you can't fix it with anything, you may need to uninstall the app and re-install it. Android usually restores all settings after you re-install and log into the app. You can see if that fixes it. Even in some rare cases, the re-install step also don't work. If that is your case, try installing older versions of the app. Good luck! There are few situations that may cause the load issue in mobile apps. The Android Calculator app server may be down and that is causing the loading issue. Please try after few minutes. Your wifi / mobile data connection not working properly. Please check your data connection. Too many users using the app at same time. Please try after few minutes. I'm having Android Calculator login issue or account related issues. If you have login or account related issue, please check the following steps. The Android Calculator server may be down and that is causing the login/account issue. Please try logging in after few minutes. Your wifi / mobile data connection not working properly. Please check your data connection. You may be trying with wrong login credentials. Please confirm the details that you are entering is correct. If you're using third-party social networks to login such as facebook, twitter, google etc, check whether that service is working properly by visiting their official website. Your account may be banned or deactivated for activities. Please read error messages. Check your wifi / internet connection for connectivity. Please check your mobile storage space. If you don't have enough space in your disk, the app can't be installed. Verify that the app you're trying to install supports your android version. Please check your wifi / mobile data connection and verify that it is working properly. It may be down and stopping you from updating the Android Calculator app. Confirm that you have enough storage space in your phone to download updates. If you don't have enough storage space, it can be blocking the app updates. Check your phone volume if you have audio problems.Try to use headphones to find out whether it is an issue with your speakers or with the app. If you've video loading problem, please check your internet speed and wifi connectivity. Go to your Apps->Android Calculator->Notifications and check whether notifications enabled or not. If it is not enabled, please enable it. Also if you don't get notification alert sounds, re-verify that you don't accidentally muted the app notification sounds. It may take some time for the app company / developer to process the payment and credit to your account. Please be patient for 24-48 hours and see if the amount gets credited to your account. If not, please contact the development company using the contact details given below.Email Address: You can go to your account menu and then mostly you may see a withdraw option once you reach your withdrawal threshold. You can use that feature to initiate a withdrawal request. You can login to your paypal and see if there is any money credited. If you don't see the transaction, you can open the app and check the withdrawal status. If you see the withdrawal is successfully processed and don't get it in your bank/paypal, contact the app developers / support.Support Email: Try the following steps if an app installed on your phone has any of these problems: Crashing. Won't open. Won't respond. Isn't working properly. If the app that isn't working is an Instant App, try these troubleshooting steps instead. After each step, restart your phone to see if it fixed the issue. Restart your phone Important: Settings can vary by phone. For more info, contact your device manufacturer. On most phones, press your phone's Power button for about 30 seconds or until your phone restarts. You might need to tap Restart . Check for Android updates Open your phone's Settings app. Near the bottom, tap System Advanced System update. Depending on your phone, you might need to tap About phone or About tablet Software update. You'll find your update status. Follow any steps on the screen. Update the app Open the Google Play Store app . At the top right, tap the profile icon. Tap Manage apps & devices. Under "Updates available," choose to update all apps or a specific app. Force stop the app Clear the app's cache & data You can usually clear an app's cache and data through your phone's Settings app. Settings can vary by phone. For more info, contact your device manufacturer. Temporarily free up space when you clear cached data. This is a short-term solution. Over time, cached data will build up again. Important: Settings can vary by phone. For more info, contact your device manufacturer. Open your phone's Settings app. Tap System Date & Time. Turn off Automatic Time Zone and Automatic Date & Time. Change the date and time to be incorrect. Turn on Automatic Time Zone and Automatic Date & Time. Uninstall the app Caution: Any data saved in this app will be erased. Open your phone's Settings app. Tap Apps See all apps. Tap the app. Tap Uninstall OK. Tip: If you want to use the app again, you can try to reinstall it. Learn how to reinstall apps. Contact the app developer Important: If you tried the troubleshooting steps but still have trouble, contact us or the app developer. Get answers from community experts Samsung Calculator app may not be working for you due to some issues that your device may have or your internet connection problem. If you think that Samsung Calculator app has an issue, please post your issue using the comment box below and someone from our community may help you. Also in the mean time you can try the fixes mentioned below. Black/White Screen is one of the most common problem in android operating system.
